Hi Cristina,

I have review the memo dated July 30, 2021 from Wetland Resources Environmental Consulting and consider it in compliance with IMC 18.10.700.C.2 and 18.10.700.D. They have also demonstrated compliance with 18.10.710. Unless the City wants them to revisit alternatives that impact more trees in order to avoid Wetland C, it seems to me that the design process has followed the avoidance and minimization measures in the code. Were there specific concerns that came up in the meeting?

Greta

Hi Greta,

Can you please take a look at the attached critical areas memo? We held an environmental neighborhood meeting on this project and one thing that came up is that the wetlands memo did not adequately address the criteria to authorize impacts to wetlands in IMC 18.10.700-710. Can you please review the attached memo ASAP!

Thanks,

Cristina

Hi Cristina,

Following up on our conversation last week here's the information requested.

- Wetland memo
- Ticket booth was included with the HS building permit. Below is an elevation with heights. Let me know if you need something additional.

- Land use sign – installed and I'm working on the affidavit. Here's a picture for the moment. Let us know when we can fill in the public hearing date.

Let me know if you need additional information.
Thanks,

Todd Sawin, PE, DBIA, LEED AP | Principal
